The Architect® Hybrid Multi-Prox access control reader facilitates your 125 kHz Prox migrations to secure and sustainable technologies.

MULTI-TECHNOLOGY READER

Offering support for the widest range of contactless identification technologies, the reader is the ideal choice for making a gradual transition to high security. It simplifies management of upgrades, technological migrations and complex multi-site configurations.

125 kHz Prox technologies

The reader is compatible with many legacy Prox technologies: EM®, HID Proximity®, AWID®, INDALA®, IOPROX®...

RFID MIFARE® DESFire® EV2 & EV3

It supports the latest MIFARE® DESFire® EV2 & EV3 contactless technologies with new data security features:

- **Secure Messaging EV2:** protection against attacks via interleaving and replay.
- **Proximity Check:** protection against relay attacks.

The reader supports the use of public security algorithms recognized by specialized and independent organizations in information security (ANSSI French cybersecurity agency and FIPS).

A CUSTOMIZED SCALABLE CONFIGURATION

The Architect® reader can be customized to meet your needs: all the features and security levels of the readers in your organization can be upgraded - by RFID card or protocol.

The scalability allows you to remove the 125 kHz module once your technology migration is completed and / or to implement new functionalities: keypad or touchscreen.

OPEN TECHNOLOGIES FOR EASY INTEGRATION

The reader is compatible with many access control systems and accepts multiple interfaces and protocols (Wiegand and OSDP™ v1 & v2).

EASY TO INSTALL

The Architect® Hybrid Multi-Prox reader delivers ease of installation for indoor or outdoor environments:

- Removable terminal block & connector
- Compatible with European and American back boxes
- Mounting on any surface, including metal, concrete, brick, etc.

STANDING THE TEST OF TIME

The design of the reader makes it very robust. It is IP65 rated for ruggedness in harsh environments and IK10 certified for vandal resistance.
