

## PNM-9002VQ

2MP/5MP x 4CH Multi-directional Camera

### Benefits

- Monitor multiple directions simultaneously without blind spots by utilising 4 sensors in 1 camera body
- Ideal for monitoring wide areas such as shopping mall entrances, lobbies and airports
- The four sensors in the multi-directional camera move independently of one another. In addition, one of the sensors can easily be removed and attached in the centre of the camera, allowing for flexible set-up
- Create the most optimal field of view for the desired monitoring areas by choosing 4 lenses with combination of modules allowing up to 20MP resolution
- Lower down TCO (total cost of ownership) by using only one VMS licence, one cable for connecting to power and network (PoE)
