

CODE: **P.- TR1HD3** v.1.1/III EN**
 TYPE: **P- TR1HD3 Set of passive video HD transmitters with BNC plug on the cable (screw terminals)**

The ability to connect transmitters (fast Click type connection)

DESCRIPTION

The P-TR1HD3 is a set of passive devices for video transmission using twisted-pair cable. These elements match the impedance of the coaxial cable (75Ω) to the impedance of the symmetrical cable (100Ω). In order to obtain the best quality of transmission and interference resistance the UTP cable Cat. 5 (or higher) is recommended. When connecting, make sure that the transmission uses cables from the same twisted pair and properly connect the cables to the screw terminals, "+" to "+" and "-" to "-". Improper connection will result in image distortion. The P-TR1HD3 is ended with BNC plug on the cable. Such design allows easy connection of these elements to devices, where the sockets are arranged close to each other. In addition, all transmitters can be combined with each other (Click system) into larger groups, which improves the aesthetics of the installation.
